

Maxthon

Maxthon Browser 2.0 FAQ

Carpe Textus
Don't just surf the Web. Seize it!

What does Maxthon mean?

It's a joining maximum and go. We wanted to suggest power and the ability to take people places at the same time.

What does "carpe textus" mean?

"Seize the Web." The Web is exciting and a place filled with opportunity. All you have to do is seize it, and Maxthon is the perfect tool to let you do that.

Since Maxthon is actually an extension of Microsoft Internet Explorer, won't people have the same security problems you find with IE?

No. Just the opposite. We've added patches and other code to close off leaks and openings that Microsoft has not yet fixed.

What are the System Requirements?

Minimum Requirements

200MHz CPU

128MB Memory

4MB Free Disk Space

Microsoft Windows 98

Microsoft Internet Explorer 6.0

Recommended System Configuration

800MHz CPU

512MB Memory

64MB Free Disk Space

Microsoft 2000/XP/2003 or Above Version

Microsoft Internet Explorer 7.0 or Above Version

Does Maxthon Browser contain Adware or Spyware?

Maxthon Browser does not contain any Adware or Spyware though it completely free.

If you found any Adware or Spyware in the installer of Maxthon Browser, please report to our forum where you download it.

Please always download and install Maxthon Browser from our Official Website to keep your computer safe.

How do you uninstall Maxthon Browser?

You can find an "Uninstall Maxthon" icon in the Program Group of Maxthon. Click it and follow the instructions to uninstall Maxthon Browser.

You can also uninstall Maxthon Browser via "Start > Control Panel > Add or Remove Programs". Click the "Maxthon Browser" entry and click the "Remove" button, then follow the instructions to uninstall Maxthon Browser.

How can I make my browser cooler looking and add more features to it?

You can create an unique browser by installing Skins, Plugins, Filter Packs and etc. for Maxthon Browser.

Generally, you can find and install them at [Maxthon Addons Website](#).

Choose "Open" when the Download Prompt dialog shows up, and then click "Install".

Currently supported file types are:

.m2s - Skin Pack

.m2p - Plug-in Pack

.m2f - Filter Pack

.m2l - Language Pack

How can I make Maxthon browser behave the way I want?

Maxthon Browser is highly customizable. You can go through the settings in "Tools > Maxthon Setup Center" to set it behave in the way you familiar with.

You can set your homepage in "Startup" section, set how to open new tab in "Tabs" section, set default search engine in "Search" section, customize Mouse Gestures in "Mouse Control" section and etc.

What about missing Images, pop-ups & script errors?

Maxthon Browser has a build-in Ad Hunter which blocks popup windows & remove possible ads banners etc. by default.

Thus some script files and objects on the web page may become unavailable and scripts in that page cannot access them on execution, then the script error will appear.

You can find out what has been blocked by click on the Ad Hunter icon on the status bar and select "View Blocked Items..."

And you can disable the Popup Blocker and the Content Filter via that icon if you don't want to remove ads on the web page.
